

We proudly announce the official release of the High Performance

DNA **Stage-3** Air Box Kit **AK-Y6E07-S3** specially designed for the

# Yamaha XT 660 X/R 2004'-2009

**This new Bolt On High Performance kit, from DNA, features:**

- Extreme air flow **111,9 CFM @ 1,5** Inches of water  
+ 40% more than the popular DNA Stage 2 application!  
+140, 49 % more than the stock air box & filter!
- 98-99% filtering efficiency for maximum engine protection
- Unique DNA air filter with built in venturi designed to smoothen out the air flow
- Dyno proven +8 HP more power from the standard engine (with Powercommander and Race slip on's)
- Dyno proven +14 HP more power from highly a modified 700cc engine
- Specially designed rubber velocity stack, increases and spreads torque over a wider rpm range, with the possibility to alter the tuned length for custom applications
- All standard parts bolt or attach to the S3 Air box (Battery, ECU, Rectifier, Temperature sensor, Idle circuit, AIS circuit, Crank case vent, Rear wheel mud flap)

- Specially designed aluminum adapter that can be modified to adapt big bore throttle bodies
- Designed to be used in rainy weather (Att. not to be completely submerged in water)
- Unique design of side covers & frame allows unrestricted air flow and catches the eye!
- Shipped ready to install, includes installation info, 2 Powercommander Maps, dyno Graphs, and air flow Graphs
- Limited production unit indentified by Serial Number.
